Re: Pagel's Pit Site--Remedial Design

Dear Mr. Parker:

In the process of reviewing the documents that have been submitted regarding the remedial design, one of the things that I had to do was determine if any of the proposed laboratories had to be audited. This I did, and the enclosed memo shows the results. Apparently nothing has to be done with regard to the Industrial Environmental Analytical lab, but a performance evaluation (PE) sample will be sent to the Warzyn Inc. lab on May 28, 1993. The PE's will just be for low level volatiles, not for metals.

If you have any questions, please call me (312-886-4746).

Sincerely yours,

A handwritten signature in cursive script, reading "Bernard J. Schorle".

Bernard J. Schorle
